ABOUT ME

- Recent Bachelor of Science in Information Technology graduate with a stellar academic record of 9.52 CGPA.
- Skilled in web development with hands-on experience in HTML, CSS, and JavaScript, capable of creating responsive and user-friendly websites. Proficient in leveraging AI tools to enhance productivity and problem-solving.
- Successfully developed a mental health application as a graduation project, showcasing strong technical, analytical, and project execution skills.
- Possess knowledge of graphic design principles, enabling creative and visually appealing solutions.
- Highly motivated, quick learner, and passionate about continuous growth in technology and development.

SKILLS

- HTML5
- CSS3
- JavaScript (ES6+)
- Responsive Design
- UI/UX Design Principle
- MySQL , SQLite
- CrossBrowser Compatibility

PROJECTS

MindCare Mental Health Android App

- Personalized Mental Health Assessment – Questionnaires help users identify depression, anxiety, or eating disorders, showing severity as mild, moderate, or severe.
- Therapeutic Chatbot with CBT – Provides supportive, CBT-based responses to reframe negative thoughts and build resilience.
- Wellness & Tracking Modules – Includes selfie journaling, mood tracking with weekly insights, music therapy, and hobbies, built with Kotlin (frontend) and SQLite (database) for reliable performance.

Independence Day Website

- Designed and deployed multiple responsive websites using HTML5, CSS3, and JavaScript.
- Optimized for mobile and cross-browser compatibility, improving accessibility and load speed.
